## EMMA LUCY GATES TO SING

Miss Emma Lucy Gates.

—From her latest photograph.

Emma Lucy Gates, the favorite prima donna, who came all the way from Berlin to spend her summer in Salt Lake, returns about the middle of September and it will be pleasant news to her many admirers that she is to be heard at the Salt Lake theater before she returns. She will give a dramatic and operatic recital, assisted by the pianist, Miss Sybilla Clayton, J. J. McClellan and a full orchestra, including members of the Symphony orchestra.

During the two years she has been absent Miss Gates has been steadily at work under the famous Berlin teacher, Corelli, perfecting herself in

smart single-breasted coat of blue taffeta with pockets trimmed in broad blue silk braid.

A smart small hat that has just made its appearance is a toque of black tulle, the crown covered with a cut jet ornament. To soften the edge there are tiny ruchings of double tulle, caught at the side with a jet buckle.

Hand-embroidered butterfly bows make excellent pickwork for venetian summers. The bows may be made of a single piece of linen lawn cut so that when drawn through the middle the bow will have the shape of the butterfly.

The uncured ostrich feather is seen again, but in better finish than when it was here a year or two ago. A new wrinkle is to arrange a handful of such feathers in fan shape. They come mostly in white for black hats and black for white hats.

The latest recruit to the ranks of the things cretonne is the cretonne ribbon. This comes in a very wide width, and while its function is principally a milliner's one, it suggests itself for sashes, parasols, borders of gowns and dress trimmings.

The long-handled Directors parasol, designed to exactly match the gown it accompanies, and finished with an oblong or white handle, is a fetish of the hour, and not a few of them have tassels and cords which impart the correct old-world air.

A coat meant to wear with any dress may be of dark blue silk heavily braided in scrolls of quilled silk in the same shade and tiny tassels. The long close sleeves need not be too tight-fitting. They can really be quite loose if only they reflect the outline of the arm.

## The Summer Dish

**Meat is heat-producing. Eat little of it in summer—little of any heavy food. Most people eat too much to keep cool. These are the days for Mapl-Flake and fruit.**

Ask your doctor.

He will tell you that whole wheat is the ideal food for summer, if the wheat is made digestible.

It gives one the maximum food value, while creating the minimum heat.

Let it serve—at least once a day—for the whole meal.

But you must have wheat that's digestible, else you don't get enough food.

And the part that doesn't digest is injurious.

That's why we steam-cook our wheat for six hours. Why we cure it.

Then we flake each berry so thin that the whole heat of our ovens can reach every atom.

Then those thin flakes are toasted 30 minutes in a heat of 400 degrees.

That is essential. Every food specialist knows it.

The particles of starch must be so separated that the digestive juices can get to them.

The result is a food that's all food—a food that all digests.

But it takes us four times as long to prepare it as it need take to make a flaked food.

## Mapl-Flake

The Food with the Maple Flavor

We cook this wheat in pure maple syrup, mainly for the children's sake.

We want them to eat it in summer—as you do—to the exclusion of heat-forming foods.

And we want them to ask you to get it again after you serve it once.

So we make it enticing.

Get one package to-day. Then stop reading our ads. We are perfectly willing to let the food itself argue then.

But get the one package—now.
